

DON'T BE AFRAID OF THE DARK.

KELA takes away fear of the unknown cyber threats all organizations face. Trusted worldwide, KELA's industry-leading technologies automatically penetrate the hardest-to-reach corners of the cybercrime underground to provide organizations with unique, contextualized and actionable intelligence at the tactical, operational and strategic levels. KELA analysts' deep expertise and customer focus provide you with tailored insights on invisible threats gathered from deep, dark, and open-web monitoring.

OUR COMMITMENT TO YOU

EMPOWER

Our intelligence, contextualized for your specific requirements, enables you to get out in front of threats and reduce organizational risk – saving you time, money and reputational damage.

EXTEND

With a highly talented and multilingual team, KELA's managed intelligence services act as your integrated but outsourced team, bridging gaps in your organization's bandwidth.

ILLUMINATE

Our expert intelligence analysts use calculated, proprietary methods to infiltrate the cybercrime underground where criminal actors are actively engaging.

PREVENT

Our world-class expertise and sophisticated technology arm you with targeted surveillance into adversaries' behavior in the cybercrime underground, so you can act before the adversaries cause harm.

Do you want to
**uncover underground
digital threats** that
are targeting your
organization?
