NOZOMI NETWORKS

PRODUCT OVERVIEW

Vantage

SaaS-Powered Security and Visibility of OT and IoT Networks

Nozomi Networks **Vantage™** leverages the power and simplicity of software as a service (SaaS) to deliver unmatched security and visibility across your OT, IoT, and IT networks.

Vantage accelerates digital transformation for the largest and most complex distributed networks.

You can protect any number of OT, IoT, IT, edge and cloud assets, anywhere.

Its scalable SaaS platform enables you to consolidate all of your security management into a single application, even as your networks quickly evolve.

Vantage delivers the immediate awareness of cyber threats, risks, and anomalies you need to detect and respond quickly and ensure cyber resilience.

**Identify**   **Assess**   **Detect**   **Act**   **Scale**

See

All OT and IoT assets and behavior on your networks for unmatched awareness

Detect

Cyber threats, vulnerabilities, risks and anomalies for faster response

Unify

Security, visibility and monitoring across all your assets for improved resilience

Identify

Asset Discovery and Network Visualization

Automatically Track Your OT and IoT Assets

Up-to-Date Asset Inventory

Eliminates blind spots and increases awareness with automated asset inventory

Intuitive Dashboards

Generates macro views as well as detailed information on assets and connections
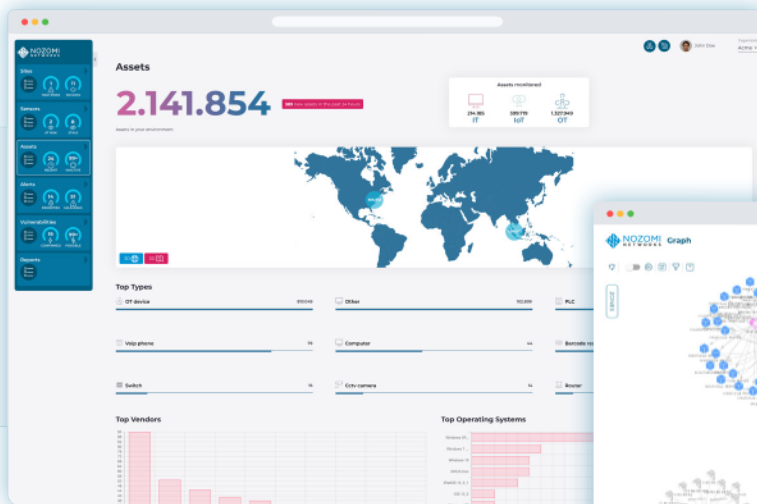

Immediately Understand Your Networks

Identifies All Communicating Devices

Provides extensive node information including name, type, and firmware version

Reduced Risk Through Network Visualization

Delivers detailed insight into your OT/IoT networks including asset behavior, roles, protocols, and data flows

Vantage Assets View summarizes all asset activity on your network for rapid assessment.
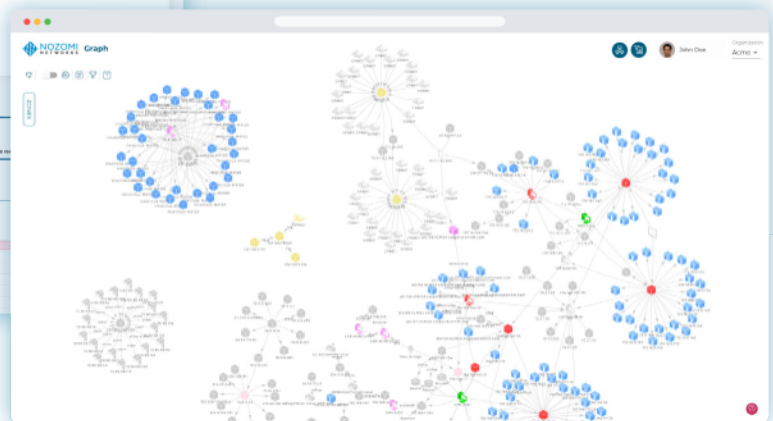

Network Visualization View displays all assets communicating on your network for real-time awareness.

Assess

Vulnerability Assessment and Risk Monitoring

Rapidly Identify Your Vulnerability Risks

Automated Vulnerability Assessment

Presents risk information including security alerts, missing patches and vulnerabilities

Correlates known vulnerabilities to Common Vulnerabilities Exposure (CVE) reports to quickly research root cause and potential impact

Efficient Prioritization and Remediation

Speeds response with vulnerability dashboards and drilldown capability

Prioritizes remediation by focusing efforts on high-impact risk reduction

Continuously Monitor Your Networks and Automation Systems

Continuous Monitoring

Continuous monitoring of all supported protocols: OT, IoT and IT

No critical blind spots in protection caused by limited monitoring or inadequate protocol support
Easy Access to OT/IoT Risk Data

Summarizes OT and IoT risk information and highlights indicators of reliability issues, such as unusual process values

Supports drilldown on visual indicators for more detailed information
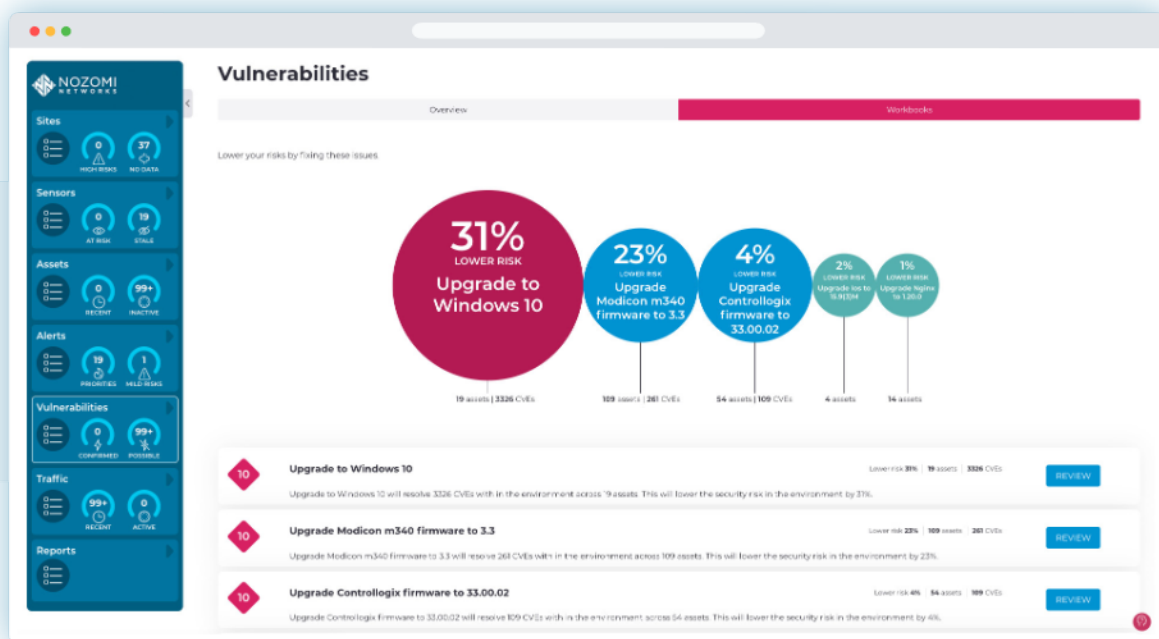

Vantage Workbooks show which vulnerabilities create the highest risk exposure and how to prioritize efforts for the greatest impact.

Detect

Advanced Anomaly and Threat Detection

Quickly Detect and Disrupt Threats and Anomalous Behavior

Constantly Updated Threat Detection

Identifies cybersecurity and process reliability threats

Detects early stage and late stage advanced threats and cyber risks

Superior OT and IoT Threat Detection

Combines behavior-based anomaly detection with signature-based threat detection for comprehensive risk monitoring

Effectively Monitor Mixed Environments

SUBSCRIPTION
Threat Intelligence

Ensures up-to-date threat detection and vulnerability identification using indicators created and curated by Nozomi Networks Labs

SUBSCRIPTION
Asset Intelligence

Powers breakthrough anomaly detection accuracy for OT and IoT devices, accelerating incident response

Breakthrough Anomaly Detection for OT and IoT

Rapid Identification of Assets

▼

Ensures Precise Asset Inventory

Accurate Anomaly Alerts

▼

Accelerates Incident Response

Asset Intelligence for Dynamic Networks

▼

Sustains Accurate Inventory & Detection

Act
Accelerated Global Incident Response

Significantly Improve OT and IoT Risk Management

User-Centric Design Accelerates Response

Focuses attention on critical vulnerabilities and prioritizes activities that can maximize risk reduction

Improves response time and productivity with pre-defined playbooks that guide remediation efforts for specific teams against each type of threat

Detailed Alerts Provide Global Perspective

Consolidates data to create accurate high-priority alerts across a global network in a centralized dashboard

Greatly Reduce Time-Consuming Research

Clear Explanation of Incidents

Describes what happened, possible causes and suggested solutions for every alert, reducing the need for additional investigation

Automatic Consolidation of Alerts

Groups alerts into incidents, providing security and operations staff with a simple, clear, consolidated view of what's happening on your networks
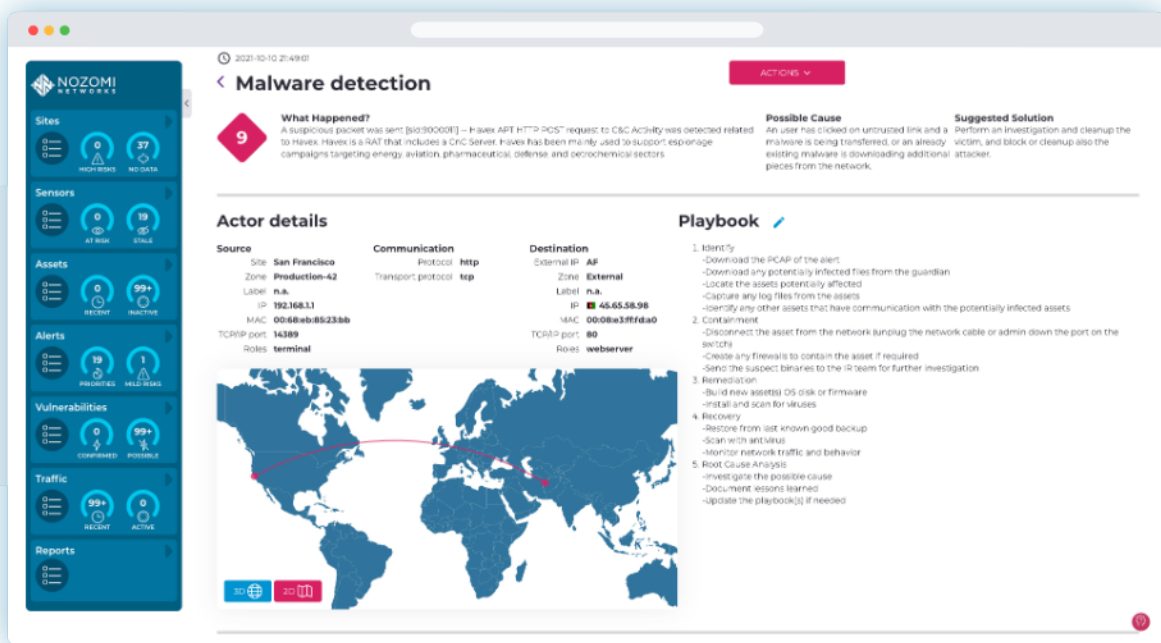

Vantage Alerts and **Playbooks** script guided remediation efforts to accelerate response.
